

Application No.: 10/019,068

Docket No.: PVZ-007US

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 6, lines 17 through 21 with the following paragraph:

The content of solid bodies in the composition of the invention may vary within fairly wide limits since the purpose of the bodies is ~~to be able to move in the gel layer in order~~ to establish zones with a high concentration of solid bodies to act as balancing elements. The weight ratio between the solid bodies and the gel is preferably from 10:1 to 1:10, more preferable from 5:1 to 1:5, in particular from 2:1 to ~~{3:1}~~ 1:3, such as 1:1 to 1:2.
